## 3 elliptic pencils

## Twisted Cubic or Line \& Conic

## Theorem AS '23

There is no hexagonal circular 3-web whose polar curve is a twisted cubic.

## Twisted Cubic or Line \& Conic

## Theorem AS '23

There is no hexagonal circular 3-web whose polar curve is a twisted cubic.

## Theorem AS '23

If the polar curve of a hexagonal circular 3-web splits into a smooth conic and a straight line, not lying in a plane of the conic, then the web is Möbius equivalent to exactly one from the following list:

## 1. Hyperbolic pencil, conic plane misses Darboux quadric

## 2. Hyperbolic pencil, conic plane misses Darboux quadric,

 symmetric

## 3. Hyperbolic pencil, conic plane cuts Darboux quadric

## 4. Hyperbolic pencil, conic plane cuts Darboux quadric,

 symmetric

## 5. Elliptic pencil, conic plane cuts Darboux quadric,

 symmetric

## 7. Elliptic pencil, conic plane cuts Darboux quadric

## 8. Parabolic pencil, conic plane cuts Darboux quadric

## 9. Parabolic pencil, conic plane cuts Darboux quadric,

 symmetric

## 10. Hyperbolic pencil, conic plane touches Darboux

 quadric
## 11. Hyperbolic pencil, conic plane touches Darboux

 quadric
## 12. Hyperbolic pencil, conic plane touches Darboux

 quadric
13. Hyperbolic pencil, conic plane touches Darboux quadric, symmetric

14. Elliptic pencil, conic plane touches Darboux quadric

## 15. Parabolic pencil, conic plane touches Darboux quadric
